

THE BRAND FIOCCHETTI WAS BORN TOWARDS THE END OF THE '60 AS THE RESULT OF A COMPANY FOCUSED ON THE MANUFACTURING OF COOLING EQUIPMENT FOR CATERING AND MEDICAL FIELDS.

The choice to dismiss the production of catering refrigerators derived, after years, from the precise will of specializing on development and manufacturing of top quality refrigerators for pharmacies, hospital, blood transfusion centers.

“Refrigerators should be able to cool”

But this is not the point. Many variables are requested to define the value of a product and its reliability in time.

Beside the management system certifications, such as ISO 9001 and 13485 (for medical devices), - certainly important and witnessing a production quality standard – what makes our products outstanding is the **refined design**, the use of **top** of the range **components**, the **advanced electronic controllers**.

Our refrigerators and freezers are stylish, complete, functional. You can tell it's a Fiocchetti at first sight. We strongly believe in our chosen path, we don't sell cheap products and we don't sell a price; we leave this to others.
